

VALUABLE WASTE WORKSHOP

Friday, April 27
10.30 - 13.00
ExMedia Lab
Filzengraben 8-10
4. OG

Keywords:

waste, food, excess, re-cycling, DIY, DIWO, organic matter, composting, humus, fertilizer, soil, smell, transformation, aerobic/anaerobic, fermentation, bokashi, microorganisms, lactic acid bacteria, yeast, vermicomposting, worms, anthropocentrism, multispecies perspectives, ecosystem, earth

You will learn to:

- build your own DIY bokashi bucket - OR - worm bin (materials will be provided)
- explore the workings of microorganisms (e.g. *lactobacilli*) and compost worms (e.g. *Eisenia fetida* or “red wigglers”) and how to cultivate them at home

You should bring:

- various organic materials, collected kitchen scraps and leftovers (more info via email after registration)

Please send an email to v.friedrich@khm.de until April 22 if you actively want to take part in the workshop as materials are limited. The workshop will be held in German and/or English.
